## Front Door Newnham House Types

## Shrewsbury Park Residents' Association

- Measurements shown are reasonably accurate. However, residents should obtain verification of measurements and ask to see actual scale drawings by the surveyor as part of the planning application and before placing an order
- Drawings are intended as illustration only to assist residents in finding a supplier
- Newnham house type front doors were always in oak with amber tinted Large Flemish glass. This pattern of glass is no longer available as a standard pattern. A reasonable alternative to Large Flemish that is currently readily available would be Pilkington Small Flemish, Pilkington Arctic or Pilkington Minster glass. All these patterns may be toughened or made into double-glazed sealed units.
- Arctic glass has the highest obscurity rating and Small Flemish the least, with Minster coming between the two
- Newnham house types are found at 20, 22, 24, 26 & 30 Ashridge Crescent and 2 Mereworth Drive

If residents have any queries, please contact me using the details below.

With kind regards,

Robert Million  
Chair, Shrewsbury Park Residents' Association
